

Improve performance, governance and security in your Hybrid Cloud environment

Empowering transformation means meeting business units' needs for agile and scalable IT

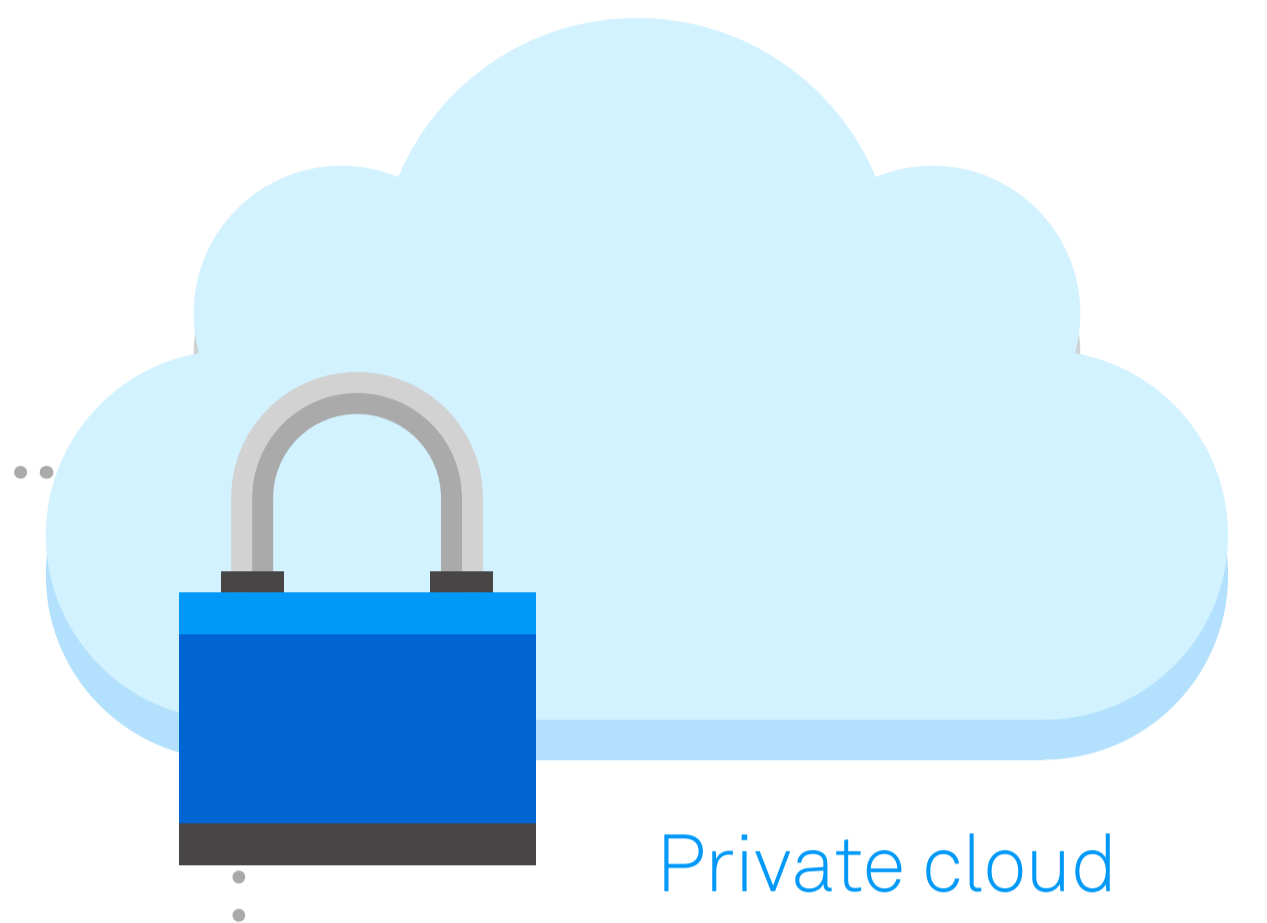

Complex

You need IT that connects to cloud services and third parties

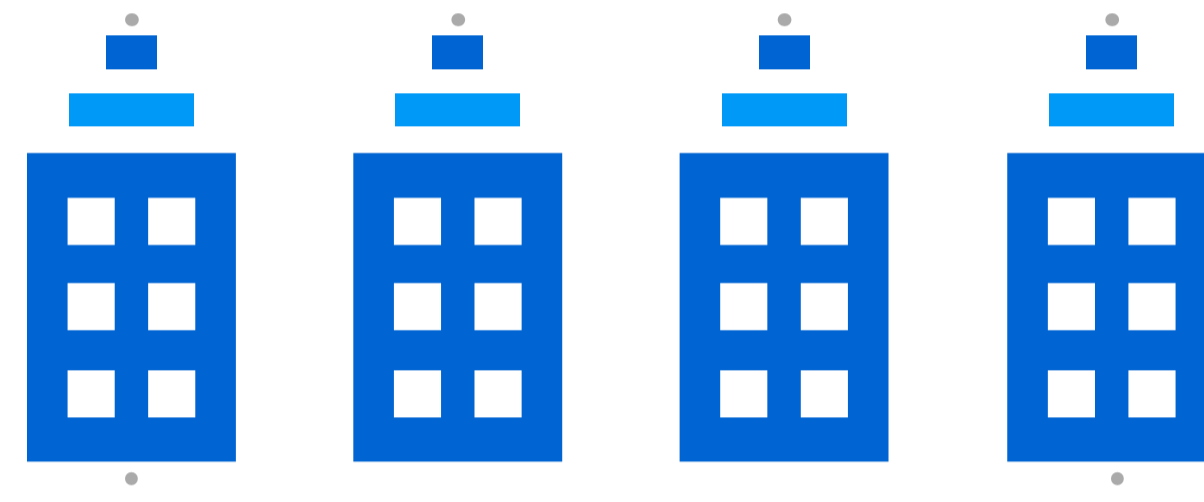

Customers, vendors, partners

Public cloud

Private cloud

Organisation HQ

55%

of MNCs are dissatisfied with their IT's ability to support disruption and business transformation goals¹

But with all these different players accessing your data, and Business Units (BU) self-provisioning shadow IT, how do you remain compliant and secure?

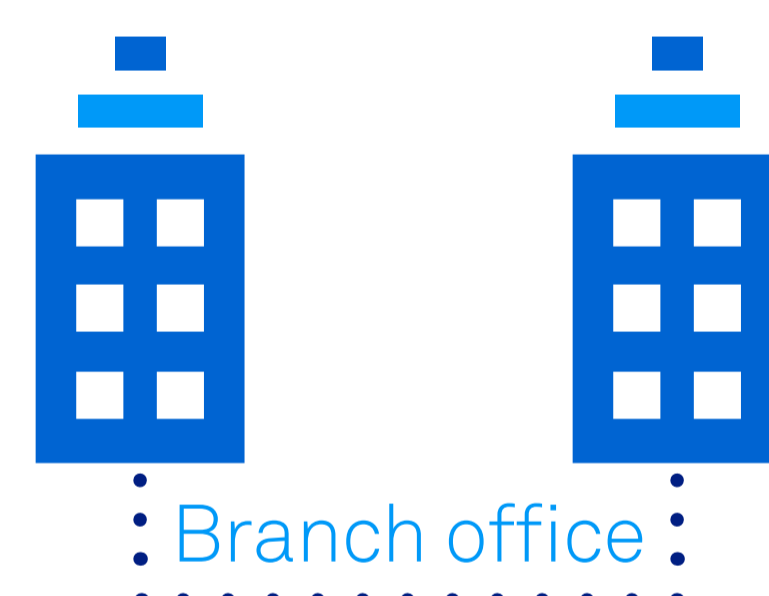

Central IT

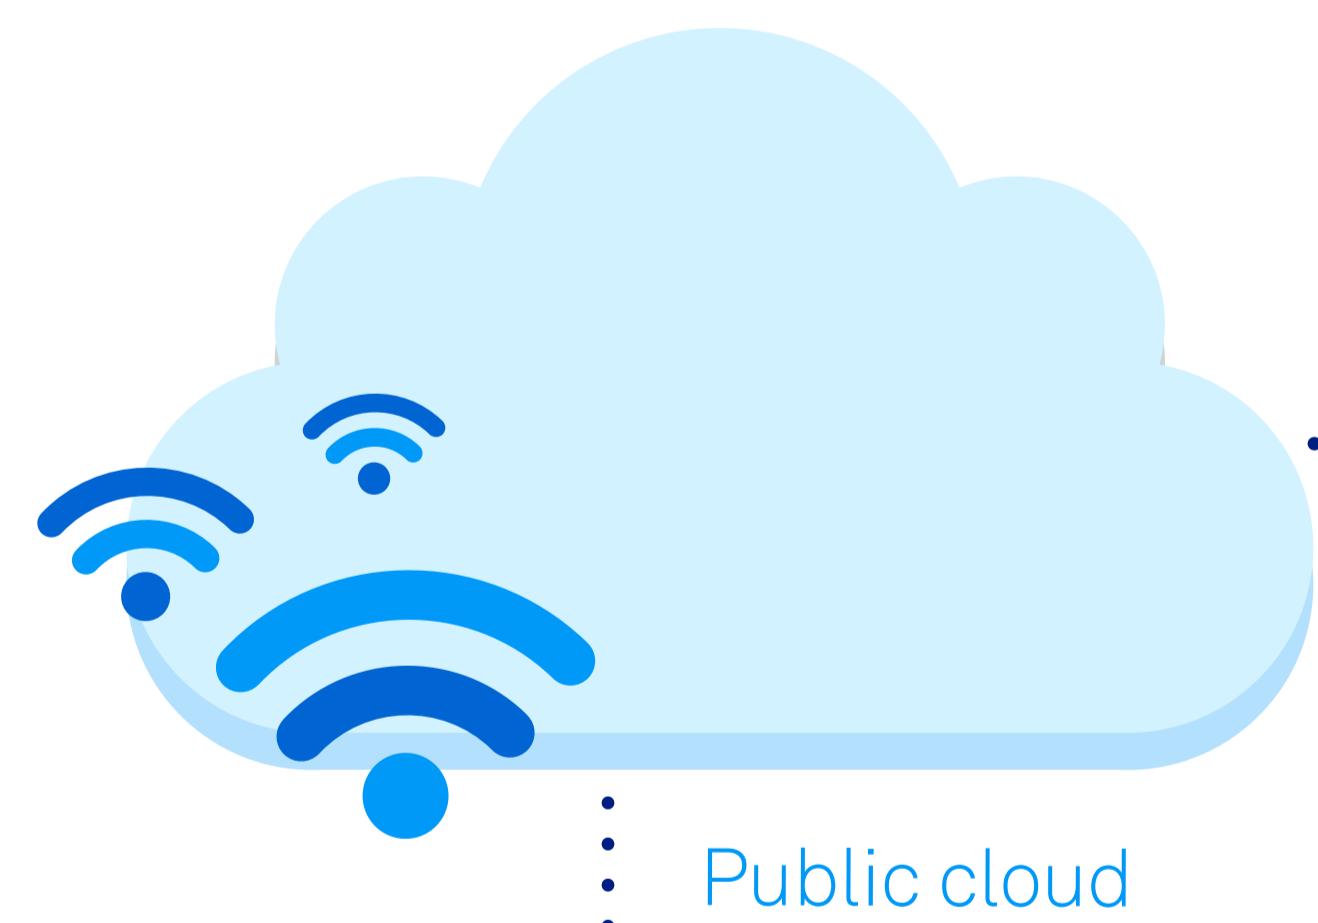

Simple, secure

Branch office

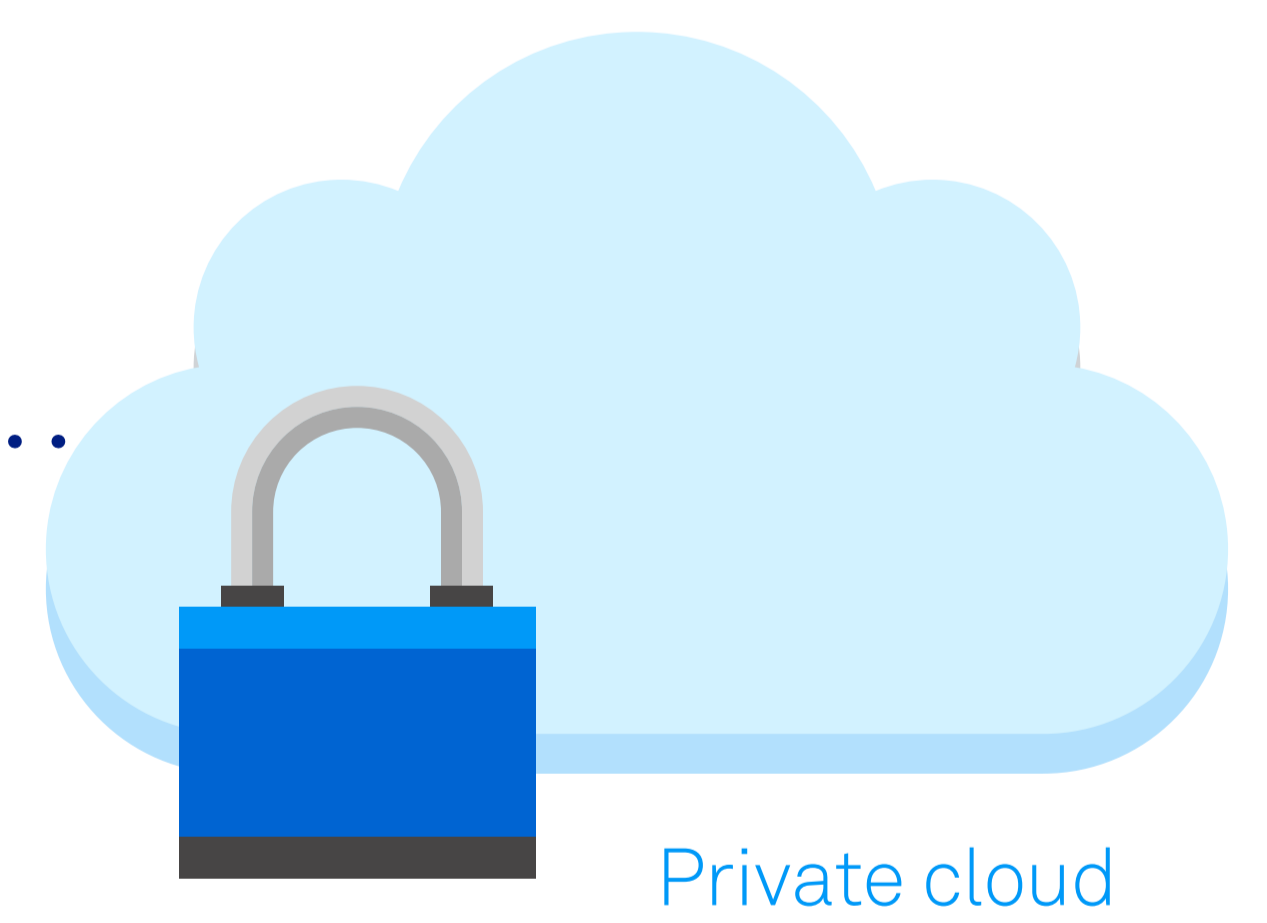

Branch office

Public cloud

Cloud Management Platform and Managed Cloud Services

Private cloud

Customers, vendors, partners

With the **Cloud Management Platform** layer, you retain visibility and control over access and application use, helping secure your business and improve performance
